Summary

With over 5 years of experience as a Frontend Developer, I have successfully delivered more than 9 large-scale projects using Vue.js and TypeScript. Known for my strong logical and abstract reasoning abilities, and technical aptitude. Additionally, I have mentored 4 junior developers, helping them grow their skills and advance in their careers. I continually research new frontend technologies to stay current and enhance my skills.

Technical Skills

- Languages & Frameworks: TypeScript, JavaScript, Vue.js (Option API, Composition API), Nuxt.js.
- Styling & UI Libraries: Tailwind, Shadcn UI, PrimeVue, Element Plus, Bootstrap Vue, Core UI, Vuetify.
- Web Technologies: HTML5, CSS3, SASS, Vite, PWA, RESTful APIs.
- Libraries: Pinia, Vuex, Axios, Ofetch, VueUse, I18n, ECharts, Chart.js, ApexCharts.

Work Experience

Enlighty AI (London, United Kingdom)

Mar 2025 - Present

- Developed a fully responsive and feature-rich **admin panel** using Typescript Nuxt.js, enhancing internal data management and user workflows. ([more info](#)).
- implemented modern **landing pages** with optimized performance and user engagement in mind. ([more info](#)).
- Acted as **Frontend Team Lead**, creating and reviewing tasks with a strong product-focused mindset.
- Ensured cross-browser compatibility, mobile responsiveness, and accessibility compliance throughout the platform.
- Collaborated with UX/UI designers to create interactive and user-friendly interfaces.
- Utilized ShadCN UI, combining the flexibility of **headless components** with accessible Radix primitives and Tailwind-based theming.
- Implemented full **multilingual support**, enabling seamless locale switching and enhancing user experience for global audiences.

Mabna Cloud (Project Based Contract)

Mar 2025 - May 2025 · (3 month)

- Designed and built Three high-conversion landing pages with performance and SEO best practices.
- Architected and implemented a new BI admin dashboard for internal analytics and reporting using Nuxt.js and Echarts.

TritApp

Oct 2023 - Mar 2025 · (1 year, 6 month)

- Migrated 2 projects from Nuxt 2 (JavaScript) to Nuxt 3 (TypeScript), improving performance by 30% and enhancing overall efficiency ([more info](#)).
- Developed new features for migrated projects, enhancing functionality and user experience ([more info](#)).
- Managed 2 junior developers, assigning and overseeing their tasks, and providing guidance to help them through their tasks.
- Created 2 new web applications using Nuxt (TypeScript), delivering robust and scalable solutions.

Targoman Intelligent Processing

Sep 2021 - Oct 2023 · (2 years, 2 month)

- Engineered 3 multilanguage admin panels with Vue.js and TypeScript, employing Git submodule to maximize code reusability across the web application.
- Designed and implemented 2 landing pages, enhancing user engagement and overall website functionality.
- Streamlined development processes by leveraging reusable components, boosting efficiency and maintainability.
- Mentored 1 intern, providing training, support, and guidance to help them develop their skills and integrate into the team.
